

OKB-UFO brush head for brush cutters

Recently, weeds are more and more often removed by means of brush cutters. The OKB-UFO is an easy to apply brush head for brush cutters with a minimum capacity of 45cc.

Due to her specific shape, a mini weeds brush is created in a way as a weeds-brush actually works the best; the tufts are placed at a weak angle, so it is a lot more comfortable concerning ergonomics than with already existing brush heads, at which the tufts are at an angle of 90°. The wear process of the tufts is also different, so you can use a set of brush heads longer.

The worn tufts can be changed quickly and in a simple way, without using special tools. One can choose to apply 2, 3 or 4 cable tufts.

Advantages:

- Firm construction that can stand rough handling.
- 20% lighter than existing brush cutter brush heads.
- Longer standby time by different brush angle.
- Simple and quickly changeable without using special tools.
- Fits ever brush cutter brand.

Patent no. EP 1457133
